DETAILED ACTION

Oath/Declaration

It does not identify the post office address of each inventor. A post office address is an address at which an inventor customarily receives his or her mail and may be either a home or business address. The post office address should include the ZIP Code designation.

Drawings

This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are vague and indefinite in the recitation of "serious infection". The term "serious" in claim 1 is a relative term which renders the claim indefinite. The term "serious" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Davankov et al. or Braverman et al.

The claims are drawn to a system for treating infection comprising passing blood through a material and re-entering the blood to the patient.

Davankov and Braverman et al. (US Patents 5,773,384, and 5,904,663) disclose a system for removing toxicants from blood comprising passing blood through a material and re-entering the blood to the patient (See Entire Documents). Davankov and Braverman et al. further disclose a method comprising withdrawing blood from a patient, passing the withdrawn blood through a charged particulate polymer and then returning the blood back to the patient. Davankov and Braverman et al. further disclose that the object of the invention is to provide a method for removing toxicants from blood or plasma, thus purifying blood and prevention infection. Davankov and Braverman et al. further disclose that the method taught may include modifications to the protocol of the bead surfaces described in the invention to purify blood (See especially US Patent 5,773,384 Description of the Preferred Embodiments).
